Experience

Product Designer II | Ascend Learning

January 2024 - Present

- Spearheaded an AI-driven Learning Path experience that leveraged historical performance data to create personalized journeys, resulting in a 25% increase in session duration and a 12% improvement in student knowledge retention scores.
- Designed an "Adaptive Learning Loop" that utilized 3-5 item diagnostic quizzes to trigger immediate content generation, increasing student feature adoption and reducing "time-to-mastery" for complex nursing modules.
- Led the UX integration of "Claire AI," designing 15+ contextual interaction patterns for real-time support that reduced user drop-off by 18% and automated the generation of study aids to streamline the learning workflow.
- Redesigned a high-complexity work hours reporting system with customized configuration tools, reducing manual data entry by 35% while maintaining 100% compliance with ACMG regulatory standards.
- Redesigned the ATI platform's flashcard feature by integrating AI-driven adaptive learning, resulting in a 12% improvement in student knowledge retention scores.
- Scaled the "Fast Track" Design System to support 7 distinct brands, achieving 100% component consistency and improving handoff efficiency by an estimated 20%.

User Experience Designer | Schneider Electric EnergySage

November 2021 - December 2023

- Mentored a team of 6 designers, implementing a Storybook-Figma workflow that improved cross-functional collaboration and reduced UI bug reports by nearly half.
- Managed cross-functional teams collaboration to prioritize and design patterns for the Marketplace across web and mobile platforms.
- Facilitated bi-weekly Design Thinking workshops, leading to a 40% faster consensus-building phase during cross-functional product discovery.

User Experience Designer | Institute for Media Innovation

September 2020 - January 2022

- Designed a multi-persona AI Chatbot for parents, integrating 3 distinct bot personalities to align with varied marketing goals and corporate branding.
- Executed an end-to-end redesign for the Space project, optimizing 5+ core communication flows to improve user navigation and task completion rates.

User Experience Designer | RENZOE BOX

September 2020 - December 2020

- Conducted user research studies—combining qualitative and quantitative methodologies—to shape business decisions based on validated user preferences and pain points.
- Analyzed online ordering processes to identify areas for improvement, directly informing the design of a more streamlined checkout experience.

Education

The University of Texas at Austin

Austin, TX / 2019 - 2021

Master of Information Science

Aarhus School of Architecture

Arhus, Denmark / 2014

Architecture Exchange Program

Central Academy of Fine Arts

Bejing, China / 2009- 2014

Bachelor of Interior Architecture

Skills

AI & UX Design Methods

AI Interaction Design (AIX): Specializing in non-deterministic UI, human-in-the-loop systems, and feedback loops for LLM-driven features;

System Design & Governance: End-to-end development and scaling of enterprise-level design systems for multi-brand ecosystems;

Accessibility (WCAG), Product Development, Journey Mapping, Information Architecture, Prototyping, Design Thinking.

UX Research Methods

Usability Testing, AI-Assisted Synthesis, Qualitative & Quantitative Research, Competitive Analysis, Heuristic Evaluation, User Interviews.

Prototyping & AI Coding

AI Coding/Dev: Cursor, GitHub Copilot, React, Tailwind CSS, Python

3D/Emerging: Unity, Rhino, Cinema 4D.
